

# INDEX

- Aims of therapy
  - as altering self processes 14
  - definition of 7
  - as removing 'roadblocks' 34
- Attachment theory
  - and behaviour 25
  - contribution and limits of 48
- Bakhtin
  - comparison of with Vygotsky 44
  - contributions of to revision of object relations theory 14
  - understandings of the self of 44
- Borderline personality disorder and CAT
  - case examples of 114, 182
  - CAT multiple self states model of 179
  - causes of 178
  - combined with multiple Axis II
    - diagnoses, case example of 189 *et seq.*
  - comparison of CAT and other models of 199
  - efficacy of CAT in 198
  - partial dissociation in 180
  - reformulation of 181
  - states grid of a case of 183, 184
- Cognitive psychology and the development of CAT 49
- Collusion, avoidance of 8, 55
- Contextual reformulation
  - case examples of 207, 209, 211
  - construction of 206
  - use of in managing difficult patients 205, 213
  - and see* Glossary
- Core
  - as describing reciprocal role repertoire 88
  - single or multiple cores of diagrams 94
  - and see* Glossary
- Countertransference
  - CAT model of 104
  - and reformulation 8
  - varieties of 104
  - and see* Glossary
- Descriptive reformulation of current procedures 81
  - and see* Glossary
- Development of self processes
  - abnormality of 50 *et seq.*
  - comparison of CAT model with attachment theory 47
  - comparison of CAT model with cognitive models 49
  - comparison of CAT model with psychoanalysis 46
  - neurobiology and 27–29
  - observational studies of 38–39
  - trauma, effect of on 29
  - Vygotskian understanding of cultural and social factors in 39 *et seq.*
- Diagnosis, problems of 131
- Diagnostic groups (Axis I) and CAT
  - asthma self-management 154
  - childhood sexual abuse 157
  - deliberate self-harm 151
  - dementia 156
  - depression 149
  - diabetes self-management 153

- eating disorders 152
- false memories of childhood sexual abuse 158
- gender issues 157
- generalised anxiety disorder 137
- learning disabilities 172
- obsessive-compulsive disorder (OCD) 138
- OCD, case example of 139
- panic and phobia 136
- post-traumatic stress disorder (PTSD) 145
- primary care frequent attenders 161
- psychosis 161 *et seq.*
- psychosis, case examples of 167, 171
- PTSD, case examples of 146, 148
- somatisation 150
- substance abuse 155
- unresolved mourning 159
- Dialogic self
  - model of 44, 59
  - and see* Glossary
- Dialogic sequence analysis
  - case illustration of 105
  - description of multiple cores in diagrams of 95
  - and see* Glossary
- Dialogism
  - contrast of with Cartesian ideas 57
  - and see* Glossary
- Diary keeping
  - based on diagrams 108
  - instructions for in Psychotherapy File 8, 232 *et seq.*
  - and see* Glossary
- 'Difficult' patients
  - causes of difficult behaviour 204 *et seq.*
  - staff responses to 203
  - varieties of 203
- Dilemmas
  - examples of in Psychotherapy File 232 *et seq.*
  - identification of 8
  - and see* Glossary
- Dissociation
  - and abnormal development 52
  - in borderline personality disorder 179
- Dropping out of therapy, causes of 12, 112
- Ego defences, CAT reconceptualisation of 96
- Evidence base for CAT
  - in process research 121
  - review of 216
  - and see* Appendix 1
- Evolutionary psychology and development of self processes 22
- Forensic patients, CAT use with 198, 209
- Gender
  - as affecting therapy 157
  - cultural formation and 38
- Goodbye letters
  - examples of 19, 118, 127, 144, 196
  - features of 113
  - introduction of 13
  - and see* Glossary
- Homework, types of 109
- Internalisation
  - as contrasted with representation 59
  - Vygotskian model of 41
  - and see* Glossary
- Implicit relational knowledge, as reciprocal role procedures 47
- Interpretation, limited use of 11
- Masochism
  - see* Glossary
- Metaprocedures
  - disruption of in borderline personality disorder 179
  - functions of 10
  - and personality structure 60
  - and see* Glossary
- Motivation
  - enhancement of by reformulation 77
  - and see* Glossary
- Multiple Self States Model, as explaining borderline pathology 179
- Narcissistic personality disorder and CAT
  - case example of 187
  - features of 185
- Object relations theories
  - and CAT theory 9
  - as influenced by Bakhtin 14
  - Vygotskian revision of 14, 43, 45, 59
- Personality disorders
  - borderline states, CAT model of 179
  - causes of 178
  - concepts of 177

- dissociation in 180
- efficacy of CAT in 198
- narcissistic personality disorder, CAT model of 185
- theoretical understandings of 199
- Pharmaceutical industry
  - influence on diagnostic practice of 134
  - influence on research funding of 230
- Practice of CAT
  - assessing patients
    - with anxiety 74
    - with depression 74
    - with somatisation 75
    - with obsessive-compulsive symptoms 75
  - assessing risk of suicide and violence 75–77
  - assessment of patients for 61, 63
  - basic features of 9 *et seq.*
  - case examples of assessment process 65, 66, 67, 68, 69, 70
  - collaborative nature of 2
  - combined with other treatments 73
  - compared to psychodynamic and cognitive approaches 14, 103, 120, 136, 138, 154, 199
  - course of therapy in 114
  - in group therapy 174
  - ideal model of 122
  - implicit and explicit values of 54
  - recapitulation of sessional events 108
  - recognition of problem procedures 108
  - research origins of 7
  - termination of therapy in 13
  - time-limited nature of xvi, 13
  - treatment contracts in 79
  - use of questionnaires in assessment for 78
- Procedures/procedural sequence
  - description of stages of 9
  - and see* Glossary
- Procedural Sequence Model (PSM)
  - features of 9
  - and see* Glossary
- Procedural Sequence Object Relations Model (PSORM)
  - development of 9
  - and see* Glossary
- Projective identification
  - CAT conceptualisation of 52
  - and see* Glossary
- Psychotherapy File
  - use of 8, 141, 147, 148, 171
  - use in reformulation process 9
  - use in screening for borderline personality disorder 181
  - and see* Appendix 2
- Personality structure questionnaire 93
  - use in screening for borderline personality disorder 181
  - and see* Appendix 3
- Rating progress
  - as changes in procedural loops in diagrams 107
  - as changes in Target Problems and Procedures 8
  - example of 18
  - method of carrying out 107
  - and see* Glossary
- Reciprocal role procedures
  - acquisition of from other children 43
  - common patterns of 90
  - concept of 9
  - in psychosis 165
  - relation of defences and symptoms to 51
  - sources of 10, 43
  - and see* Glossary
- Reformulation
  - as compared to case formulation 81, 131
  - creation of diagrams in 89
  - examples of reformulation letters in 16, 83, 86
  - impact of 82, 97
  - location of symptoms and defences in 12
  - process of 81
  - use of diagrams in 10–11, 87
  - use of letters in 10
  - and see* Glossary
- Repertory grids
  - and development of the CAT model 7, 43
  - and characterisation of states with 180
  - dyadic form of 7
  - research uses of 7
  - states grid, example of 183–184
  - and see* Appendix 4
- Research
  - as source of CAT model 3, 7
  - problems with 216
  - into process of therapy 121
  - into treatment of borderline personality disorder 198

- and see* Appendix 1 for discussion and references
- Resistance  
CAT model of 14, 111  
*and see* Glossary
- Role  
as defined in CAT 9  
*and see* Glossary
- Scaffolding  
by teachers, parents and therapists 41
- Self  
attachment theory and 25  
CAT model of 34 *et seq.*  
comparison of CAT with Jungian and object relations models of 37  
cultural variations in idea of 37  
dialogic nature of 35  
evolutionary background of 22  
false self 57  
integration of processes of 34  
innate factors in 25, 26  
narrative sources of subjective sense of 35  
permeability of 36  
role of others in formation and maintenance of 36  
social formation of 42  
symbol use and 24  
*and see* Glossary
- Self-monitoring  
instructions for in the Psychotherapy File 8, 232 *et seq.*  
of procedures 13, 135  
of symptoms 124  
*and see* Glossary
- Self-reflection  
extension of in therapy 4  
provisions of tools for 100  
and resilience 27
- Self states  
as dissociated reciprocal role procedures 11  
as distinguished from states 93  
as listed in Psychotherapy File 232 *et seq.*  
theoretical nature of 93  
*and see* Glossary
- Sequential diagrams  
basic form of 10  
construction of 94 *et seq.*  
detailed use of through therapy 115  
examples of 18, 91, 126, 142, 143, 170, 186, 188, 190  
'exits' from 97  
locating reported and enacted events in 116 *et seq.*  
stages in the construction of 141, 190
- Sign mediation  
failures and distortions in caretakers' provision of 43  
in pre-verbal development 40  
*and see* Glossary
- Snags  
examples of in Psychotherapy File 232 *et seq.*  
identification of 8  
*and see* Glossary
- Stagnation of therapy, causes of 110
- State  
as defined in CAT 9  
as distinguished from self state 93  
*and see* Glossary
- State switches or shifts  
in borderline personality disorder 179  
during assessment 73  
*and see* Glossary
- 'Superaddressee'  
definition of 44  
differences in nature of between therapeutic models 45
- Supervision of therapists  
CAT model of 128  
distance supervision, methods of 130  
use of audiotapes in 129
- Symptom monitoring  
as increasing patients' self-awareness 74  
use of in reformulation process 9
- Target problems (TPs)  
description of 8  
*and see* Glossary
- Target problem procedures (TPPs)  
description of 8  
examples of 16, 169  
in a psychotic patient 169  
*and see* Glossary
- Theoretical model of CAT  
biological components of 28, 30, 75  
comparison with cognitive-behavioural models 57, 120  
comparisons of with psychoanalytic models 37, 57, 102, 120

- cultural influences on development in 30
- dialogic basis of 59
- early conceptualisations of 8
- evolution of xv
- influence of Bakhtin on 44
- influence of Vygotsky on 39
- influence of studies of early development on 38
- integration of cognitive and psychoanalytic models in 1
- philosophical assumptions of 59
- values implicit in 2, 21, 55, 217
- Therapeutic change
  - CAT model of 8, 15, 56
  - common factors in 53, 73, 120
  - comparison of CAT and cognitive models of 54
  - reformulation, recognition and revision in 12
  - support of by technical procedures 107
- Transference
  - CAT model of 103
  - negative aspects of 12
  - psychoanalytic understanding of 102
- and see* Glossary
- Traps
  - examples of in Psychotherapy File 232
  - et seq.*
  - identification of 8
  - and see* Glossary
- Vygotsky
  - contribution of to CAT theory 39
  - introduction of ideas of 14
- Working alliance
  - contribution of reformulation to 12
  - impact of transference–countertransference on 106
  - as scaffolded by therapist 101
- Zone of proximal development (ZPD)
  - in early development 41
  - in supervision 128
  - and see* Glossary
- Zone of proximal personality development (ZPPD)
  - definition of 42
  - and see* Glossary
